

Greater Manchester Joint Wound Care Formulary v1.0 August 2016

Every effort has been made to ensure the most commonly used shape and size products have been listed. The PIP code and NHS code of each product has been listed below and are available on prescription and/or via direct purchasing e.g. Stores (NHS Supply Chain [SC]).

Key:

DP = Formulary products that are available exclusively by Direct Purchasing only and are not listed in the Drug Tariff (June 2016) i.e. not prescribable on FP10.

NHS Code† = Alternative pack and/or product sizes are available by direct purchasing routes. The clarification by procurement colleagues is required if sourcing formulary product via the listed NHS codes. Products NOT AVAILABLE via NHS SC have been indicated below.

G = Product that requires specialist input before use. Clear objective treatment plan needs to be decided upon and re-evaluated at regular intervals to ensure it is still the most appropriate treatment of the wound.

Within each category, if there is no preferred FIRST choice product provided, the product choice appears in alphabetical order. The available shapes and sizes of each product are listed in cost order based on unit cost (Source: ₤ Drug Tariff [June 2016] unless otherwise stated).

Category	Name of product	Description/ Size/ Shape	Units per Pack	Cost per unit ₤	PIP code	NHS Code †	Manufacturer/Distributor		
1	Acrylic	Tegaderm Absorbent Clear Acrylic dressing	7.6cm x 9.5cm oval	5	£3.17	346-6224	EKH023	3M Health Care Ltd

BANDAGES - Many of these bandages have similar appearances. Great care must be taken to ensure the correct bandage is provided and applied. Any bandage if applied incorrectly can cause a breach of skin integrity with a possible tourniquet effect. Compression bandages should only be applied to patients with venous leg ulcers, on whom a full assessment and Doppler examination has been carried out by nurses who are fully trained and competent in leg ulcer management.

DP = Formulary products that are available exclusively by Direct Purchasing only and are not listed in the Drug Tariff (June 2016) i.e. not prescribable on FP10.

NHS Code [†] = Alternative pack and/or product sizes are available. Clarification by procurement colleagues is required if sourcing formulary product(s) via direct purchasing routes.

15	BANDAGES - Many of these bandages have similar appearances. Great care must be taken to ensure the correct bandage is provided and applied. Any bandage if applied incorrectly can cause a breach of skin integrity with a possible tourniquet effect. Compression bandages should only be applied to patients with venous leg ulcers, on whom a full assessment and Doppler examination has been carried out by nurses who are fully trained and competent in leg ulcer management.
