

**GMMMG Interface Prescribing  
Subgroup**

**Schedule for review of RAG list  
and associated shared care  
guidelines.**

The GMMMG Interface Prescribing Subgroup will review each BNF Chapter of the RAG list on at least an annual basis for any changes required due to new evidence/MHRA Drug Safety Updates following the full review of the RAG list in 2014/15.

It was agreed that reviews should take place under BNF chapter and that the RAG list should be reviewed alongside any shared care guidelines. All RAG status decisions will also take into consideration any commissioning implications.

For shared care guidelines, the aim is to have one approved GMMMG shared care guideline with any local variations in the appendices. All local shared care guidelines that are currently on the website will be removed and superseded with a GM wide version.

The following table shows when reviews are proposed to take place. Please note this may be subject to change.

<b>BNF Chapter</b>	<b>Date to be reviewed</b>
<b>Review of Progress to date</b>	May 2015
Chapter 2 – Cardiovascular	June 2015
Chapter 7 – Obs, Gynae and Urinary tract	June 2015
