

August 2017				
An extra mid-quarter edition to inform of the reductions in Category M prices. However, as these are proposed to be retained by NHS England, these savings are lost - just when they're needed due to significant NCSO pressures particularly from levetiracetam, olanzapine, quetiapine and sumatriptan .				
So it's really fingers crossed the pregabalin savings come through, unscathed by NCSO. However, a back-of-the-envelope calculation for my local CCGs suggests pregabalin savings are outweighed almost 2:1 by NCSO. Remember also, NCSO is now automatically applied without dispensers' endorsements, so the predicted impact worksheet is likely to offer an as accurate as possible prediction.				
Lines (included here) for which NCSO has been granted in July are highlighted orange.				
Significant price increases:				
Again, a few highlighted lines. These include atorvastatin 60mg (which there is no good reason to prescribe) and further increases for olanzapine orodispersible sugar-free tablets.				
Propiverine prices are up 10% and included, probably just this once.				
Significant price decreases:				
Category M prices have been reduced by £15M a month for the next 12 months. This has reduced the price of every category M line by 7.6-10.5%				
The other big news, of course, is the long-awaited reduction in price for pregabalin and what's probably a record for the quickest Category M entry post patent expiry. Most but not all strengths included here; reductions range from 94-98%!				
Fluticasone inhaler prices are down and included, probably just this once.
