

June 2017				
A slight inflationary pressure in most CCGs from mainly Category A increases.				
<b>Significant price increases:</b>				
Most of low concern although those involving the less frequently used tamoxifen strengths may be of note: 10mg up 25% to 47.21 and 40mg up 16% to 48.72 .				
<b>Significant price decreases:</b>				
Just the continuing fall for aripiprazole 30mg tablets, down another 10% to 14.17				
Do also watch the NCSO concessions e.g. ethosuximide 250mg/5ml solution and mefenamic acid 500mg tablets at around 40x and 10x Tariff price respectively. Sumatriptan 50mg tablets are likely to cause a degree of cost pressure for some.				
May 2017				
Note a new feature added by Mark on the Estimated Impacts worksheet for Category changes. In anticipation of the changes to the price of pregabalin, the estimated impact categories have now been updated to clearly identify products that are moving category so as not to show a disproportionate effect.				
<b>Significant price increases:</b>				
Only 180 dose size of glyceryl trinitrate spray increasing by nearly 4%. Other increases are of probably of low significance but it may be worth keeping an eye on fludrocortisone 100mcg tablets which have gone up 23% to 30.45 .				
<b>Significant price decreases:</b>				
Two to note: Aripiprazole 30mg tablets drop another 15% to 15.79 Phenytoin 100mg capsules have been reduced by almost 4/5 to 9.14. No change for other strengths.				
Overall, the effect is slightly negative, probably driven by the two decreases highlighted above.				
April 2017				
Continuing downward pressure on prices...				
<b>Significant price increases:</b>				
A few highlighted lines; the largest increases being for ropinirole 1 and 2mg tablets although these have been subject to monthly concessions for some time.				
<b>Significant price decreases:</b>				
There are decreases - indeed they outnumber the increases - but no major ones in the highest volume lines.				
The overall decrease in Category M is around 2%.

### March 17

Categories A and C changes only and despite increases outnumbering decreases by 2:1, the overall impact is generally slightly negative.

#### Significant price decreases:

Only two to speak of: aripiprazole 30mg tablets are down nearly 10% to 20.65 and, after a direction from the CMA, all strengths of phenytoin capsules are down though percentages vary: 25mg by 54% to 7.26, 50mg by 41% to 9.37, 100mg by 21% to 42.88 and 300mg by 27% to 41.94 . More to come here....perhaps in May.

#### Significant price increases:

None

### February 17

Mid-quarter so no Category M changes and most are therefore Category A. However, the overall impact seems to be neutral, or even very slight savings compared to the previous month.

#### Significant price decreases:

Again, aripiprazole 30mg tablets continue to drift downward, this month to 22.83

#### Significant price increases:

Not high volume lines but ampicillin 250mg capsules have tripled in price to 20.50 and 500mg double to 40.30, both for 28.

Quinagolide 75mcg tablets are also noted to double to 55.00

Do scroll right on the Drug Tariff Updates worksheet to find drugs whose concession prices are 10 times and up to 40 times the Tariff price (naratriptan 2.5mg and ropinirole 5mg respectively).

### January 2017

A new quarter and Category M prices are generally down.

Most or all CCGs will see an overall net reduction in anticipated spend. (See Estimated Impacts worksheet)

#### Significant price decreases:

After last quarter's increases, isosorbide mononitrate 10mg and 40mg tablets come back down in price

Rasagiline 1mg tablets are down a further 77%.

Pioglitazone prices are also significantly down.

#### Significant price increases:

Valsartan 160mg capsules more than double in price.

Metronidazole 400mg tablets almost quadruple.

## December 16

No Category M changes so the reductions imposed in May which were only supposed to last until September continue...

As in November, most changes are Category A lines with a few Category C.

### Significant price decreases:

Again, just one and again, it's aripiprazole where 28x30mg tablets drop a further 15% (503p) to 29.35

Remember orodispersible 10 and 15mg tablets are almost 50x more expensive than plain release.

Significant price increases:

What were Predfoam® enemas are up 70% to 132.50 for 14

Three in Chapter 13:

What was Dermovate-NN® cream and ointment up 18% to 75.50 (30g)

DT Description	Price	Category	Price change	Percentage
All strengths of tacrolimus ointment up 20% so e.g. 30g x 0.03% now 23.33				
Zineryt® also up 20% e.g. 30ml now 9.25				
Pilocarpine eye drops up again.				
<b>November 16</b>				
No Category M changes as expected but we'll see if any come in next month with the new Community Pharmacy funding arrangements.				
Thus nearly all changes are Category A lines although a few Category C ones too.				
<b><u>Significant price decreases:</u></b>				
Just one! (there are others but they're not large volume lines)				
Aripiprazole 30mg tablets down 17% to £34.38 (28)				
<b><u>Significant price increases:</u></b>				
Lithium carbonate 250mg tablets (100) up 81% to £87				
The other notable increases are Category C lines so based on brands:				
Flixotide <b>Accuhalers</b> up 20%				
Ventolin <b>Accuhaler</b> up 20%				
Tamsulosin 400microgram / Dutasteride 500microgram capsules (30)				
i.e. Combodart also up 20% (to £23.76)				
And most strengths of pilocarpine eye drops now cost more than £10.				
<b>October 2016</b>				
Despite a new quarter, Category M changes are generally slight. Although October is the usual month for major changes to the Community Pharmacy Contract, an announcement is due in the middle of the month to take effect from December 2016. In the meantime, the overall impact of this month's Category M changes seem to be a slight overall reduction.				
<b><u>Significant price decreases:</u></b>				
Frovatriptan 2.5mg tablets change from Category A to M with a 29% reduction.				
Rasagiline 1mg tablets make the same move with a 66% reduction.				
<b><u>Significant price increases:</u></b>				
Isosorbide mononitrate tablets rise 2-3 fold.				
Alfacalcidol capsules move from Category M to A with price rises.				
The addition of further generic descriptions into Part VIII is welcomed.

<b>September 2016</b>				
Again, no Category M changes at all this month as would be expected "mid-quarter".				
Despite continuing upward drift of many Category A prices, <b>the overall impact is very small.</b>				
<b>Price decreases:</b>				
Continuing the recent trend, the price of aripiprazole 30mg tablets falls, this time by 21% to 49.48 (28)				
Rivastigmine 9.5mg/24hour patches are down 11% to 28.52				
<b>Price increases:</b>				
Otrivine eye drops are up 43% to 3.35				
Some price rises for Concordia lines are noted:				
Dicycloverine tablets up 16% to 184.25 and 196.69 for 28x10mg and 28x20mg respectively				
90 Nefopam 30mg tablets up 4% to 66.70				
Trimipramine 50mg capsules up 27% to £190 (28)				
Trimipramine 10mg and 25mg tablets up 16% to 179.63 and 200.50 respectively (28)				
The addition of more generic descriptions into Part VIII is welcomed.				
<b>August 2016</b>				
No Category M changes at all this month so some mid-quarter stability and a return to "normality".				
Nevertheless, the general upward drift of many Category A prices continues.				
Most notable price increase is the 29% rise in the price of rivastigmine patches to £32.08 for 30.				
The most significant decrease is the 14% reduction in the price of aripiprazole 30mg tablets to £62.88 for 28				
Overall budgetary impact is slight.				
The addition of a number of generic descriptions to Part VIII will further reduce the potential for inflated non-Part VIII charges.				
<b>July 2016</b>				
Further Category M changes (both decreases and increases) and a few more limes worth reporting this month so another report...				
Price changes are in comparison to June.				
Some chapter classification errors and other bits from June also corrected / tidied up.				
Overall there appears to be a further small saving on June.
