

October 2017 TW Commentary

October 2017				
The usual quarterly change of Category M prices...				
Some are down e.g. pregabalin though this has been the subject of price concessions since the patent expired and how this price can be further reduced when price concessions make it far more expensive than the listed price, I just don't know.				
And some are up....the overall effect of Category M is inflationary due to the significant rises in the price of olanzapine and sumatriptan, perhaps starting to reflect the price concessions although with the exception of sumatriptan 50mg tablets, the Category M price is no where near the (i.e. September's) concession price. Levetiracetam is also up but again, the Tariff price is no where near last month's price concession.				
Lines (included here) for which price concessions have been granted in September are highlighted orange. Price concessions were eventually granted for 11.8% of Category M lines last month.				
Should price concessions continue, these will far outweigh the effects of anything written on this worksheet.				
Significant price increases:				
Olanzapine and sumatriptan already mentioned; both strengths of betahistine tablets have now been included in 4.6.				
Significant price decreases:				
Olmesartan has now moved into Category M with an 86% price reduction and is now included in 2.5.				
Remember that Category A changes are compared with September, Category M changes are compared with August.
