

December 2020

Just a couple of notes this month.

As most will know, lithium carbonate 200mg and 400mg modified release tablets have increased in price as a new price has been agreed for Priadel tablets. Prices are now slightly more than double e.g. 100x400mg now £8.50 from £4.02 .

Note that this increase has been backdated to last month (November): <https://www.nhsbsa.nhs.uk/updates-november-2020-drug-tariff>

And for the first time in six months, there are no price concessions for sertraline tablets. Of course, the Tariff price has risen from where it was at the beginning of the year: now £4.22 for 28x50mg tablets and £5.89 for 28x100mg tablets.

The Tariffwatch Elves are now off to prepare for Christmas and will return in the New Year.
