

## October 2021

Good news for CCGs budgets this month: Category M prices are down by almost £27M for this quarter.

<https://www.nhs.uk/pharmacies-gp-practices-and-appliance-contractors/drug-tariff/drug-tariff-part-viii>

Remember that in order to smooth cashflow across the system, changes in Category M prices to deliver the correct amount of margin to pharmacy contractors will now happen quarterly and so changes should be smaller in magnitude e.g. there will no longer be a large adjustment every October.

Consequently, most Category M prices are down. However, some - notably those lines subject to price concessions recently - are up. The magnitude of Category M changes for each line are very different with an average reduction of around 6.5%.

Some changes are commented on here. These and others are highlighted below.

Eplerenone has risen again this month with 50mg tablets nearly doubling in price to 20.49 for 28.

Enalapril 10 and 20mg tablet prices are coming down, nearer where they'd be expected to be. In contrast, olmesartan 40mg tablets are up 5-fold.

Lower strengths of pregabalin capsules have risen again, although higher strengths are little changed.

Trimethoprim 200mg tablets have risen again, although this month's increase is much smaller than last time.

Tamoxifen 20mg tablets are down again, now just over £7 for 30.

After commenting on a reduction last quarter, fusidic acid 1% eye drops have gone back up to 29.92.

As always, Category M price changes are compared with last quarter while Category A changes are compared against last month.
