

October 2022
A quarterly Category M change and there is an overall upward drift in prices by around 3%.
However, again Price Concessions are having a significant impact and are probably increasing Category M costs by twice that. There were 132 of these last month, very slightly down on August's record of 139.
There is actually some price stability with a number of Category M lines unchanged.
Some changes are commented on here. These and others are highlighted below.
I've added famotidine tablets to the table of price changes below; these have risen to somewhere near last month's concession price. Nizatidine 150mg capsules are up by 75% although 300mg are up by much less.
After last quarter's large increases, losartan tablets are mainly down this time and after commenting on the large increase for prasugrel 5mg tablets last time, now 10mg have doubled in price.
Aripiprazole 30mg tablets are up by over half.
Atomoxetine capsules drop a little again.
Ibandronic acid 50mg tablets have nearly doubled in price, although 150mg are little changed.
Solifenacin tablets have also approximately doubled and tiroprium tablets are also significantly up.
Fusidic acid 1% eye drops have dropped again but sodium cromoglicate eye drops are up by nearly half.
As always, Category M price changes are compared with last quarter while Category A changes are compared against last month.
