

| January 2023   |       |          |              |            |
|--|-------|----------|--------------|------------|
| A quarterly Category M change and there is an overall uplift in prices of around 6% with the actual impact for organisations being dependent on product mix.                                       |       |          |              |            |
| We had a record breaking number of 197 Price Concessions for December and this month's Category M increases are mainly in recognition of such recent price increases in the market.                |       |          |              |            |
| More details on the PSNC website here: <a href="https://psnc.org.uk/our-news/january-2023-category-m-prices-announced/">https://psnc.org.uk/our-news/january-2023-category-m-prices-announced/</a> |       |          |              |            |
| As usual, I comment on some significant price changes here; others are highlighted below.  |       |          |              |            |
| Also, this time around, a significant number of drugs have changed category. Most of these I don't comment on but you will see some of them below.   |       |          |              |            |
| Rabeprazole 20mg tablets have gone up 6-fold.  |       |          |              |            |
| Losartan tablets have dropped again but telmsartan tablets have gone up.   |       |          |              |            |
| Temazepam tablets are up 3-4 fold but this is way below the concession price granted for last month.   |       |          |              |            |
| Category M strengths of aripiprazole (5,10,15mg) have risen significantly, with the 10mg strength up 14 fold to 22.82 . However, quetiapine tablets have come down.                                |       |          |              |            |
| Antidepressants such as citalopram and escitalopram are up significantly.  |       |          |              |            |
| Soluble 500mg paracetamol tablets are up over 40% to 21.71 (100)   |       |          |              |            |
| Clarithromycin 500mg tablets have gone up nearly 3 fold to 668 (14). Penicillin V 250mg tablets are also up.   |       |          |              |            |
| Alendronic acid tablets have risen significantly as have risedronate 35mg tablets, both reflecting recent price concessions.   |       |          |              |            |
| For a change, solifenacin tablets have come down this quarter, but trospium 20mg tablets have doubled in price to 1091 for 60.   |       |          |              |            |
| Diclofenac 25mg tablets have moved from Category M to C and tripled in price to 413 for 28.  |       |          |              |            |
| Fusidic acid 1% eye drops continue to fall but this time, sodium cromoglicate eye drops have fallen too. Prices now 2095 and 614 respectively.   |       |          |              |            |
| I'm now hoping to have a break until April, but that will probably depend on whether this quarter's price increases result in far fewer concessions...   |       |          |              |            |
| DT Description   | Price | Category | Price change | Percentage |
