

May 2023				
Although a month late, I have done the usual table of changes that I would have done for April. All prices herein are for April and the the very limited commentary provided then is repeated just below.				
178 concessions listed this month.				
Uplift in costs for cat M is about 4.75%				
Still no sitagliptin in Cat M.				
Other commentary for <u>April</u> follows:				
Melatonin 2mg modified release tablets are down by nearly half to 825 for 28.				
Temazepam tablets are up again, more than doubling.				
Most aripiprazole prices show large swings: 5mg quadrupled, 10mg down by nearly a third, 15mg more than doubled, yet 30mg barely changed.				
Zolmitriptan 2.5mg tablets have also quadrupled, now 896 for 6				
Topiramate tablets have also increased significantly this month with 25, 50 and 100mg strenghts up althogh 200mg have dropped by a few pence, but remain more than three times the price of using 2x100mg.				
Prednisolone 5mg soluble tablets have nearly tripled in price to 5655 for 30.				
I now report on fesoterodine 4mg and 8mg modified release tablets (Category M) as these are down by over four fifths to 446 and 467 respectively (both for 28)				
Finally, contrasting changes for the price of two eye drops: after recent falls, fusidic acid is up nearly two thirds to 3428 while sodium cromoglycate drops are down by a similar margin to 223, just in time for the hayfever season.				
There would have been no commentary for May.
