

July 2023

Let's get straight in with the big news this quarter and completely unexpectedly, apixaban has entered Category M with a 12% reduction for 2.5mg tablets and a 19% reduction for 5mg. Consequently, these lines have been added to this Tariffwatch and will be reported on from now on.

Other big news is that at long last, sitagliptin tablets have also entered Category M. Reductions range from 85% for 25mg to 41% for 100mg.

In fact, this month is a good news month for primary care prescribing budgets as not only do we have the savings from these new Category M lines, but because of excess margin having been gained by Community Pharmacy in the last quarter of the 2022 calendar year, there is an overall reduction in Category M prices.

However, don't count on this lasting: there has been significant upward pressure on prices recently and this will eventually feed through in increased prices toward the end of this calendar year / early next.

Other price changes to note:

Melatonin 2mg modified release tablets are down another 21% to 653 for 28

Lower strengths of aripipazole tablets are down by 37 - 47% although the reduction for 30mg is much less.

Atomoxetine went up last month and down this in case you think you're having déjà vu with this month's price.

Topiramate tablets have increased again month, with 25, 50 and 100mg rising 2-3 fold, although 200mg (Category A) are little changed.

Nitrofurantoin tablets have also risen significantly so 28x50mg and 28x100mg now 1344 and 1405 respectively.

Finally, fusidic acid eye drops are up again, although only by 25p to 3453.

There were 111 price concessions in June - still into 3 figures but a lot fewer than in April and May.

DT Description	Price	Category	Price change	Percentage
