August 2023
Just a very limited commentary for this month.
Main thing to note is the steep rise in the impact of price concessions for July. There were 133 concessions granted. Do look at the Estimated Impacts sheet for the effect on your locality.
Only other price changes of significant note are: atomoxetine capsules have gone up this month by around 10%, insuln degludec is down 14% until December, lithium carbonate 200 and 400mg tablets are up 66% and permethrin cream is up 24% to 10.56, if you can obtain any.
