

October 2023				
Welcome to a good news quarter!				
To quote the NHS Business Services Authority (https://www.nhsbsa.nhs.uk/pharmacies-gp-practices-and-appliance-contractors/drug-tariff/drug-tariff-part-viii):				
<i>Category M for October 2023 contains adjustments for underlying market prices (between April – June 2023) and the result of the margin survey (latest result up until end of March 2023). As well as the adjustments for market prices, medicine margin will be adjusted downwards by £21 million per quarter through Category M reimbursement prices.</i>				
Therefore, Category M prices are mainly down but again, these are likely to be tempered by price concessions of which there were 134 in September.				
The other big news which most will already be aware of is the massive drop in the price of apixaban with both strengths down by around two-thirds.				
Other price changes of note:				
Melatonin 2mg m/r tablets are down again and are now 532 for 30.				
Lower strengths of aripiprazole are down by one third to one half.				
Atomoxetine is up and will probably rise further if current shortages don't ease.				
After recent increases, the prices of topiramate tablets have reduced a little.				
Clarithromycin tablets have increased fairly significantly e.g. 14x500mg up by three-quarters to 997.				
Sitagliptin tablets are down but only the 50mg by any great amount.				
These and some other fairly significant price changes highlighted below.				
DT Description	Price	Category	Price change	Percentage
BNF 1.2				
Alverine 60mg capsules (100)	306	M	-20	-6.1%
